PROFILE

Adaptable app developer with expertise in Flutter and Dart, dedicated to crafting seamless and engaging user experiences. Passionate about integrating data science into innovative applications. A quick learner with a strong work ethic, excelling in both independent projects and collaborative environments. Driven by a commitment to continuous improvement, efficiency, and cutting-edge development.

EXPERIENCE

FLUTTER DEVELOPER INTERN | PYROGUARDS JAN 2025 - MAR 2025

- Developed responsive and visually appealing UI while integrating the app with a Python backend.
- Worked on a full-stack e-commerce and machine learning project, enhancing both frontend and backend.
- Utilized Git for version control and gained experience in network tunneling using Ngrok.

FLUTTER HEAD GOOGLE DEVELOPERS GROUP | SKASC NOV 2024 - APRIL 2025

- Led workshops and mentored students on Flutter, Dart, and project IDX for app development.
- Conducted sessions on Git version control and integrating technologies like blockchain, REST APIs, and Google Teachable Machine.
- Guided students in building real-world applications using diverse tech stacks.

PROJECTS

SightCompanion

 Sept 2024

Sight Companion is an accessibility app for visually impaired individuals, built with Flutter. It features YOLO and ML Kit for object detection, a QR scanner, text-to-speech, color detection, and a document reader. The app also includes a Braille learning game, an audiobook library, and a sign language teacher. With voice command support and a scalable design, it enhances accessibility and independence.

Ecom :)

  Jan 2025

A scalable e-commerce platform built using Flutter for the frontend and MongoDB for the database. It features RESTful APIs developed with Node.js and Express.js, with Ngrok for secure network tunneling. Real-time analytics are displayed using Power BI, and the web version is deployed on Netlify. The project includes mobile, web, and desktop applications for a seamless shopping experience.

EDUCATION & CERTIFICATIONS

M.Sc. Software Systems (Integrated)	2022-2027
Sri Krishna Arts and Science College	CGPA : 8.9
Coimbatore	
Flutter App Development	Google Cloud
Google Data Analytics Specialization	Google
Introduction to Data Science	IBM
Google Cloud and Generative AI	GDG
UI/UX Specialization	CAL Arts
AWS Fundamentals	AWS
Power Bi	Guvi IITM
Python	Guvi IITM

ACHIEVEMENT

Flutter Head Google Developers Group
SKASC'25

TECH HACK'24 Winner 
Presented PlantGram, an ML-based crop prediction solution for farmers.

IMPARATHON'24 Finalist 
Presented SightCompanion – An ML-based navigation app for visually impaired individuals. Only Software Solution to enter finals.

Paper Presentation International Conference'25
Advanced Safety Management in Autonomous Vehicles Using MLLMs.
