The Power of Continuous Integration

- 1 Code Commit
- 2 Build
- 3 Test
- 4 Merge

2

Automate Your Workflow with CircleCI

3

Speed Up Your Development Cycle

Faster Builds

Frequent Deployments

4

Integrate with Your Favorite Tools

GitHub

AWS

Docker

Slack

ircleci

GitHub

Build, Test, and Deploy with Confidence

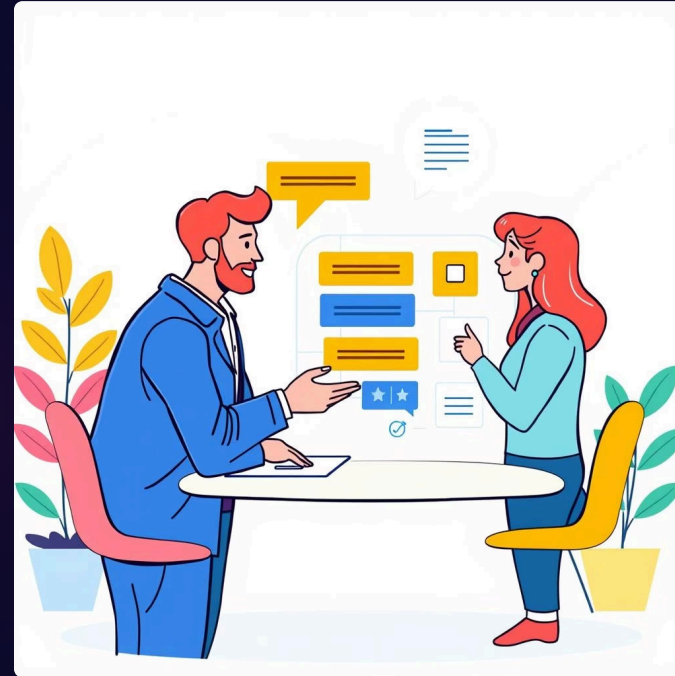

6

Enhance Collaboration and Visibility

Real-Time Metrics

Monitor build success rates and failure trends.

Team Insights

Identify bottlenecks and optimize workflows together.

Secure Your Pipelines

Encryption

All data is encrypted in transit and at rest.

Access Control

Granular permissions to protect your pipelines.

Audit Logs

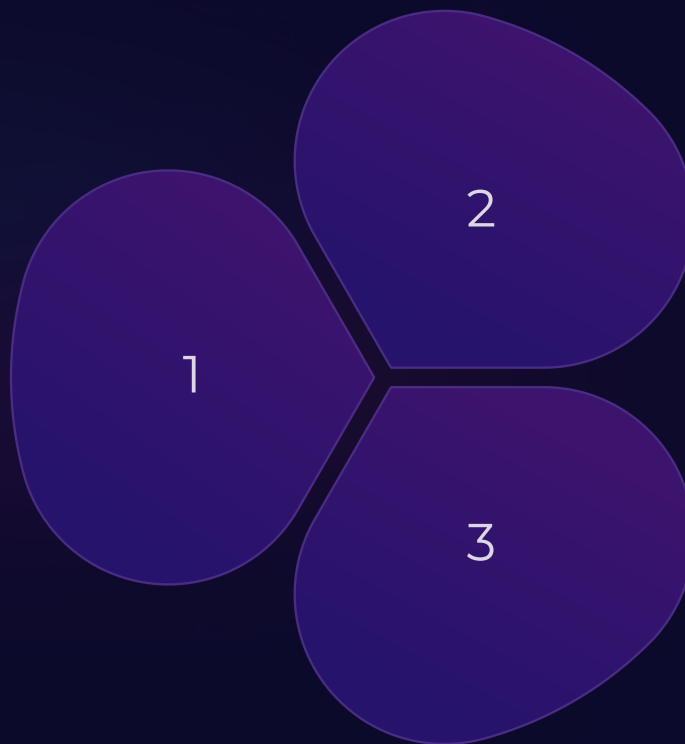

Track all pipeline activities for compliance.

8

Scale Effortlessly

Elastic Resources

Automatically adjust your compute based on demand.

Parallel Workflows

Distribute workloads

Get Started with CircleCI Today

Join thousands using CircleCI to accelerate development. Sign up and start building better software now.
